

# Abid Hussain

## Web Developer

I am a dedicated web developer with expertise in HTML, CSS, JavaScript, PHP, and MySQL. Since August 2022, I've been creating dynamic and responsive web applications, continuously improving my skills through personal projects and freelance work. I am passionate about delivering high-quality, user-friendly digital solutions.

## WORK EXPERIENCE

### Website Development

HTML, CSS, JavaScript, PHP, MySQL

08/2022 - Present

### Frontend Developer

HTML, CSS, Bootstrap, JavaScript, JQuery

08/2022 - Present

### Backend Developer

PHP MySQL

08/2022 - Present

### WordPress Developer

Coding GUI

08/2022 - Present

## PERSONAL PROJECTS

### PHP Projects

- **SMTP Server for Email Communication:** Implemented a custom SMTP server using PHP to facilitate reliable email sending for various applications.
- **Registration Form:** Designed and integrated registration forms with validation and user authentication features to ensure secure data handling.
- **Online File Storage System:** Created a cloud-based file storage solution with server-side scripting, allowing users to upload, manage, and access files securely.

### Today News Letters (WordPress website)

- "Today News Letters" is a dynamic news blog website created using WordPress. It features a clean, responsive design with customized themes and layouts for a modern look. The site organizes news articles into categories for easy navigation and provides an intuitive, user-friendly interface. This project was submitted as part of university tasks, showcasing skills in WordPress development and web design customization.

### Professional Portfolio

- I designed and developed a dynamic portfolio website showcasing my web development skills and projects. The site features a sleek, animated navigation bar for an engaging user experience.
- Additionally, the contact form is integrated with WhatsApp, allowing visitors to easily send messages directly to me. I also installed an SSL certificate to ensure secure and encrypted communication. This project highlights my front-end development proficiency and my commitment to enhancing user interaction and security.

### Final Year Project

- For my final year project, I developed an online wallet system that facilitates money transfers between two beta users and allows users to send money to other popular wallets such as Cashmaal, Payeer, and WebMoney. This dynamic and user-friendly website is designed to provide a seamless and secure transaction experience. The project demonstrates my ability to create complex financial applications with a focus on usability and functionality.

## SKILLS

HTML CSS JavaScript Bootstrap

JQuery PHP MySQL WordPress

Laravel Ethical Hacker

Software Quality Assurance

## ACHIEVEMENTS

### Web Designing Course

Corvit System Sahiwal

### Website Development Course

Corvit System Sahiwal

### Website Development

Corvit System Sahiwal

## EDUCATION

BS Computer Science (2020-24)

## CERTIFICATES

### Website Development (11/2023 - 02/2024)

I have learnt HTML, CSS, JS, jQuery, PHP, MySQL
